

# The Multicultural Postdoctoral Fellowship Program at UNC Charlotte

UNC Charlotte is recruiting STEM postdoctoral fellows to support its commitment to diversity, inclusion, and building a strong intellectual community of scholars from different backgrounds. The purpose of the MPFP is to support the early development of scholars from historically underrepresented groups who show promise of distinguished academic careers. Postdoctoral fellows are required to be in residence each semester and may teach up to two courses per academic year as part of their two-year appointment. The postdoctoral fellow will receive extensive university and program mentoring throughout their term.

Applications in any STEM discipline represented at UNC Charlotte are welcome. Please specify your discipline of interest when applying.

Applicants must have completed their doctoral degree within the past five years and no later than July 1st of the year of the fellowship.

Applications are accepted on-line at <http://jobs.uncc.edu>

The application deadline is December 31, 2016 at 5:00PM EST.
